IV МІЖНАРОДНА ВУГІЛЬНА КОНФЕРЕНЦІЯ
INTERNATIONAL COAL CONFERENCE

Potential solutions to environmental challenges – Ukraine‘s Platform for Sustainable Development experience

Oleksandr Brykalov, mayor of Myrnohrad, Council member of Platform for Sustainable Development of Coal Towns (Donetsk region)

Kyiv, 13 July 2021

Platform for Sustainable Development of Coal Towns of Donetsk Region:

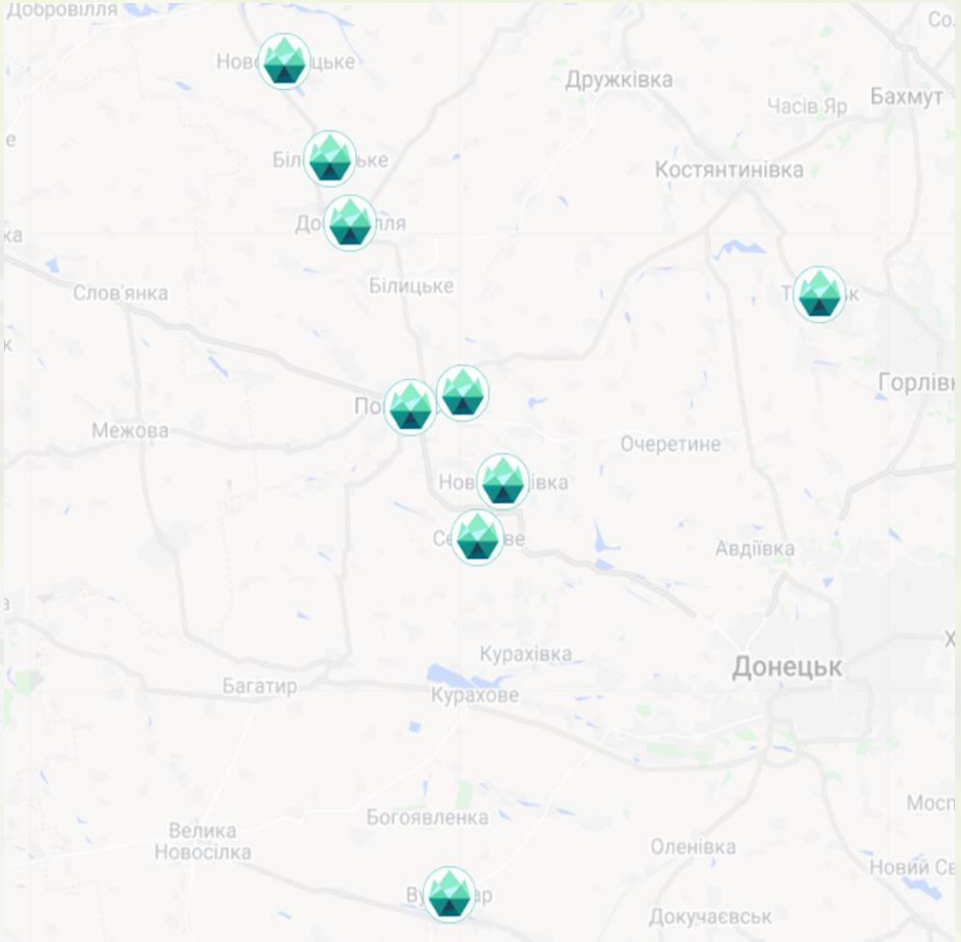

- Established in May 2019;

- Initially 6 towns, 3 local NGOs and CCI;

- As of June 2021 – 9 towns;

- 3 mayors are part of the national Coordination Centre for the Transformation of Coal Regions

- More info: https://justtransition.org.ua/en/main-en/

Environmental issues

- Air pollution (coal-for-heating, several towns);
- Spoil piles;
- Land deformation;
- Mining water

Project ideas:

- Installation of PV-stations on the roofs of municipal buildings (19 projects in 7 towns) + documentation;

- Reuse of coal mining water:

❑heat generation;

❑technical water – usage in agri etc.

Joint Transformation Strategy

- Supported by BMZ, USAID, EU COM;
- Finalization in late summer 2021;
- Has strategic goals:
  - 50%RES in electricity and 30% RES in heat generation by 2030
  - Development of alternative water supply, including reusage of mining water

“Pilot” project on structural transformation of coal mines in Myrnohrad and Chervonohrad within the GIZ project “Support of structural changes in coal regions of Ukraine”

Thank you!
